

Global Chemicals LLC

Delivering Industrial Chemistry
with Purpose & Precision

As a leading chemical company, we provide essential solutions for all industry sectors, committed to excellence and sustainability in every action. Explore our offerings and discover how we can serve your needs.

About Global Chemicals LLC

Global Chemicals LLC, we provide advanced chemical solutions for key industries like oil & gas, water treatment, laboratories, construction, and manufacturing. Based in Oman with a strong logistics network, we offer high-performance chemicals, technical support, and eco-friendly options that meet industry and environmental standards.

Excellent Quality

We are known for providing excellent quality products.

Fast Service

Our quick service ensures timely delivery for our customers.

Local Expertise

We offer industry expertise with a local touch and global reach.

Since we started, we've become a top chemical partner for major industrial businesses across Oman and nearby Gulf countries. Our technical team knows both the industry and chemistry well.

Our location in Ghala, Muscat helps us keep plenty of stock and deliver quickly throughout the region. We have invested in special storage facilities that follow international safety rules for chemical storage, ensuring our products stay good and protecting the environment.

Vision & Mission

Our Vision

To be the leading provider of innovative and sustainable chemical solutions, driving industrial excellence while ensuring environmental responsibility and long-term value for our customers and communities.

Our Mission

To deliver high-quality, efficient, and eco-conscious chemical products tailored to industry-specific challenges. Through innovation, reliability, and customer focus, we enhance performance while supporting Oman's commitment to sustainability.

Industries We Serve

Global Chemicals LLC provides specialized chemical solutions across a diverse range of industries, each with unique operational challenges and requirements. Our deep understanding of sector-specific processes allows us to deliver targeted formulations that enhance efficiency, extend equipment life, and support sustainability goals.

Oil & Gas Production & Refining

Comprehensive solutions for upstream production, midstream transportation, and downstream refining operations. Our chemicals enhance recovery, protect assets, and optimize processes from wellhead to refined product.

Water & Wastewater Treatment

Advanced formulations for municipal and industrial water treatment, ensuring safe, efficient, and compliant operations for potable water, process water, and wastewater management systems.

Hospitality & Swimming Pools

Specialized chemicals for water quality management in hospitality environments, including disinfection, pH balancing, and clarity enhancement for swimming pools, spas, and water features.

Laboratory & Research Institutions

High-purity reagents, analytical grade chemicals, and laboratory supplies that meet strict quality standards for scientific research, quality control, and analytical testing applications.

Industrial Plants & Utilities

Specialized chemicals for power generation, manufacturing, and industrial utilities, including boiler treatments, cooling water systems, and process additives that maximize efficiency.

Construction & Infrastructure

Concrete additives, waterproofing agents, and specialized construction chemicals that enhance durability, performance, and workability of building materials in Oman's challenging climate.

Our Product Divisions

Global Chemicals LLC organizes its extensive product portfolio into specialized divisions, each focused on specific industrial applications and supported by technical experts with deep domain knowledge.

Water & Wastewater Treatment

Comprehensive chemicals for industrial and municipal water systems:

- TCCA 90 Tablets & Calcium Hypochlorite for disinfection
- RO Antiscalants & Dechlorinators for membrane protection
- Biocides, Coagulants, and pH Adjusters for process optimization
- Alum, Ferric Sulphate, and Polymer Flocculants for clarification
- Cooling Tower Dispersants and Chlorine Dioxide generators

Oilfield & Refinery Chemicals

Specialized formulations for upstream and downstream operations:

- Demulsifiers and Scale/Corrosion Inhibitors
- Asphaltene & Paraffin Control Chemicals
- Field-specific Biocides and Oxygen Scavengers
- Drag Reducing Agents for pipeline efficiency
- H₂S Scavengers and Pour Point Depressants
- Environmentally-compliant Tank & Pipeline Cleaners

Membrane & Thermal Systems

Formulations for RO plants, cooling systems, and boilers:

- Advanced RO Antiscalants for challenging feedwater
- Boiler Oxygen Scavengers and passivation agents
- Non-oxidizing Cooling Water Biocides
- Polymeric Dispersants for suspended solids
- Automated pH Controllers and dosing systems

Laboratory Chemicals

- We supply analytical reagents, buffers, solvents, and specialty lab chemicals that meet industry-grade precision and purity for applications including hydrocarbon analysis, corrosion/scaling simulation, and environmental monitoring.
- AR/HPLC Grade Solvents for precise analytics.
- Volumetric Solutions with certified concentrations.
- Buffers & Indicators for quality control testing.
- Specialty kits developed for refinery laboratories.

Industrial Lubricants & Additives

- Our portfolio includes industrial-grade lubricants and specialty additives for equipment protection and construction applications.
- Compressor oils, high-temperature greases, and bearing lubricants.
- Modified Bitumen and asphalt additives for road construction.
- Industrial Paraffin Wax and waterproofing agents.
- Surfactants including LABSA, SLES, and ethoxylated bases.

Why Choose Global Chemicals LLC

Global Chemicals LLC distinguishes itself through a combination of technical expertise, local presence, and customer-centric service that addresses the unique challenges of operating in the Gulf region.

Technical Formulation Expertise

Unlike generic suppliers, we develop tailor-made chemical blends specific to each client's operating conditions. Our formulation capabilities include:

- Site-specific water treatment programs based on actual feed water analysis
- Custom-blended oilfield chemicals matched to crude characteristics
- Climate-adapted construction additives for Oman's extreme temperatures
- Process-specific laboratory reagents with certificates of analysis

Local Warehousing & Supply Chain Efficiency

Our substantial Muscat-based inventory eliminates long lead times and shipping uncertainties:

- Over 300 chemical products stocked in our Ghala warehouse
- Same-day emergency delivery within Muscat metropolitan area
- Reduced logistics costs through consolidated shipping
- Elimination of international shipping delays for critical chemicals

Regulatory Compliance & Documentation

We maintain comprehensive documentation and certifications for all products:

- Complete MSDS in multiple languages for operational safety
- REACH compliance for applicable products
- ISO 9001:2015 quality management system certification
- Ministry of Environment approvals for regulated chemicals

Quality, Safety & Compliance

Rigorous Quality Control

Meticulous raw material selection, comprehensive in-house testing, and batch traceability ensure every product meets global standards.

Strict Regulatory Adherence

Full compliance with local and international regulations (MECA, IMDG, GHS), maintaining transparent records and continuous monitoring.

Certified Excellence

ISO 9001:2015 certified processes, authorized distributor status, and regular third-party audits validate our commitment to quality.

Continuous Improvement & Support

Proactive shelf-life monitoring, client training, and immediate emergency response foster ongoing safety and operational excellence.
